

D&B DataVision

Unlock Your Growth Potential

IDENTIFYING THE BEST OPPORTUNITIES

Marketers are trying to create a single view of customers and prospects to identify growth strategies. But disconnected silos make it difficult to identify the best opportunities. Fragmented, out-of-date data results in guesses to make strategic decisions. In fact, according to a recent Dun & Bradstreet study, only 13% of marketers feel they have optimal data coverage in key market segments.

A DATA-DRIVEN APPROACH

Reaching the right demand units requires a data-driven approach. D&B DataVision is a cloud-based solution that helps B2B marketers profile, visualize, and segment their global customer and prospect data to identify the right targets for growth. By combining internal customer attributes with D&B DataVision's universe of companies and contacts, marketers can have a 360-degree view of their target markets. With this intelligence, marketers can identify renewals, cross-sell and upsell targets, and new market expansions to optimize go-to-market planning.

Once the right targets are identified, D&B DataVision can provide look-a-likes based on 120M+ business records, and 600+ firmographic attributes to build new pipeline opportunities.
