

D&B Credit Advantage

Personalise your credit risk management insight by combining your accounts receivable data with Dun & Bradstreet's industry-leading data and analytics.

D&B Credit Advantage, an advanced edition of the D&B Credit line of products, delivers a personalised credit risk management experience so you can strategically conduct new customer application reviews, account management, and collections prioritisation.

In addition to all of the features of D&B Credit, with D&B Credit Advantage you'll be able to combine your A/V data with D&B's unrivalled predictive and performance-based credit scores and analytics to easily spot pockets of risk in your customer base. By seeing your data combined with D&B's, you can take specific action unique to your business to prioritise collections, mitigate the potential of write-offs, and take advantage of areas of opportunity.

Additionally, you can drill down to identify risk exposure by corporate family and display the risk in your portfolio by outstanding dollar and aging ranges.

D&B Credit Advantage can help you take a more strategic approach to collections management. After all, the longer accounts are past due, the less likely a company is able to collect in full. Use D&B Credit Advantage to not only to capture all your high-risk accounts, but also to see and follow up with your moderate and lower-risk customers—so you can collect faster and accelerate revenue.

D&B Credit Advantage leverages D&B's proprietary diagnostic models to determine risk in the marketplace and calculate the predicted default rate for each account in your portfolio. That information - combined with your data on how accounts are paying you - helps you to benchmark and validate that your bad debt reserve is maximising working capital.

Become more efficient and collaborate with other departments. With D&B Credit Advantage, you'll be able to provide sales opportunities for your business development and sales teams by identifying existing customers who represent a low credit risk but could have the propensity to buy more. And, corporate linkage reporting identifies your largest customer "families" so your team and sales can provide higher levels of service for greater customer satisfaction and loyalty.
